

CRS-1000

1000W SINGLE OUTPUT DC/DC CONVERTERS

GENERAL FEATURES:

- Designed according to EN50155
- Fire and smoke: EN45545-2 approved
- High input-output isolation
- Adjustable output voltage
- Remote inhibit
- Remote sensing
- Input & Output OK LEDs
- Output failure alarm
- Input reverse polarity protection
- ORing FET option
- Different cooling options
- Efficiency up to 94%

	24Vin 14,4V ... 30V	36Vin 21,6V ... 47V	48Vin 28,8V ... 60V	72Vin 43,2V ... 90V	110Vin 66V ... 144V
24Vout	CRS-1000-6475	CRS-1000-6487	CRS-1000-6478	CRS-1000-6481	CRS-1000-6484
48Vout	CRS-1000-6476	CRS-1000-6488	CRS-1000-6479	CRS-1000-6482	CRS-1000-6485
72Vout	CRS-1000-6490	CRS-1000-6491	-	-	-
110Vout	CRS-1000-6492	-	-	-	CRS-1000-6493

INPUT

Input voltage range	See table
Input undervoltage shutdown	55% to 60% V_i nom
Maximum allowed input ripple	15% V_{in} nom (EN50155)

OUTPUT

Output voltage	See table
Output voltage adjustment	
V_i min = 60% V_i nom	-10% ... +0% V_o nom
V_i min = 70% V_i nom	-10% ... +15% V_o nom
Line regulation (I_o = nom)	< 0,2 %
Load regulation (V_{in} = nom I_o : 0...100%)	< 0,2 %, 2,5 % for ORing FET option
Ripple	< 50 mVpp
Noise (BW = 20MHz)	< 100 mVpp
Max. overvoltage protection	< 140% V_{out} nom
Maximum remote sense	0.3V / pole

ENVIRONMENTAL

Storage temperature	-40°C ... 85°C
Operating temperature range I_o : 100%	-25°C ... 55°C (-40°C ... 55°C, see note-1)
Operating temperature range I_o : 75%	-25°C ... 70°C (-40°C ... 70°C, see note-1)
Cooling	Natural convection
Maximum Relative humidity	95% with no condensation
Shock and vibration	EN61373 Category 1 class B body mounted
MTBF (at 40°C and 75% load)	350.000h acc. to IEC61709 Cooling options R, V, D 250.000h acc. to IEC61709 Cooling option C
Service life (at 40°C and 75% load)	20 years (Option C fan maintenance at 10 years is required)

EMC

Emission	EN61000-6-4, EN50121-3-2
Immunity	EN61000-6-2, EN50121-3-2

SAFETY

Safety	EN60950 EN50155
Dielectric strength Input-Output	3000Vac, 4200Vdc 1min.
Dielectric strength Input-Earth	1500Vac, 2100Vdc 1min.
Dielectric strength Output-Earth	1500Vac, 2100Vdc 1min.
Fire and smoke	EN45545-2:2013 +A1:2015

MECHANICAL

Approximate weight	2500g
--------------------	-------

CONTROL

Remote inhibit range	Logic: 1=OFF, Range: 15 ... 143 Vdc, Impedance > 27k Ω
Alarm contacts	1A @ 24Vdc, 0.3A @ 150Vdc, 1A @ 125Vac
Local: Input OK, Output OK	Green LEDs

PROTECTIONS

Against overloads and short-circuits	Current limiting
Against output over-voltages	Shutdown (reset by input switch off)
Against over-temperature	Shutdown with self-recovery
Against reverse input voltage.	Input fuse (Active protection with option H)
Against input under-voltage.	Under-voltage lock-out
Against Input over-currents	Input fuse

Note-1: The unit can start up and work at an ambient temperature of -40°C with the following restrictions:

- 1) Do not handle the connection terminals below -25°C.
- 2) The output ripple can rise up to 150mVpp at -40°C

OPTIONS INFORMATION	Letter code
Fan cooling (2 fans with speed control)	C
Fan redundancy cooling (4 fans with speed control working at half speed at full load)	R
Convection cooling	V
Conduction cooling	D
Hold up time of 10ms at 1000W. Includes: <ul style="list-style-type: none"> • Active protection against input reverse polarity • Active inrush current limiter at $< 2 \cdot I_{nmax}$ (Maximum Input current) 	H
ORing FET for redundancy. Includes a passive current sharing by voltage drop $< 2.5\%$	O

Accessories must be ordered in a separate order line

Option C: Fan cooling

Option R: Fan redundancy cooling

Option V: Convection cooling

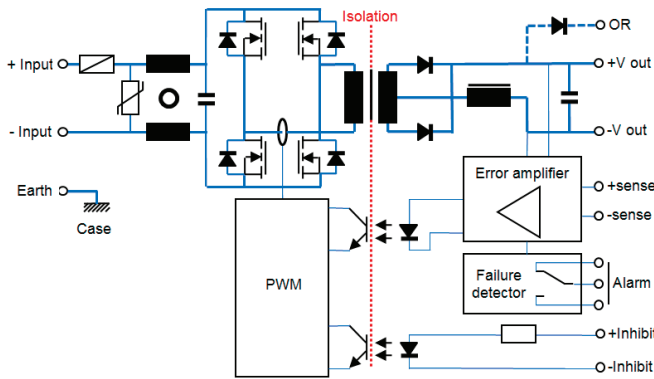

Option D: Conduction cooling

24V input	<14.4 V	15.4 V	16.8 V	>30 V
Rest	< 0.6·Vin nom	0.6·Vin nom	0.7·Vin nom	>1.25·Vin nom

DESCRIPTION

The CRS-1000 series consists of DC-DC converters with a galvanic isolation input-output and fixed switching frequency.

For maximum regulation, the remote sensing terminals can be connected to the load. This will allow a power cable voltage drop of up to 0.3 V on each cable to be offset.

The device is protected against overloads and short-circuits by means of a current limiting circuit.

The device is also protected against reverse polarity input voltage, and the input fuse blows if an improper connection is made.

When a converter input under-voltage condition occurs, the converter is disabled, thus preventing the battery from becoming totally discharged.

INSTALLATION

The product has been designed to be installed on a chassis by means of the included mounting brackets.

With the option of natural convection, the heatsink fins must be mounted in vertical position. With the other cooling options there is no preferred mounting position.

With forced air options, the inlet and outlet air must be free of elements that cause an airflow reduction (the minimum recommended distance to other objects is 50mm).

It is necessary to take into account the environmental conditions of maximum temperature and altitude, since they can limit the maximum output power. See the figure "Power derating vs ambient temperature & altitude". If you have the option "R" (4 fans), the temperature values in brackets can be used. In this case the redundancy of ventilation is lost.

START-UP

Perform connection according to the figure. Use of remote sensing is not mandatory, but if this is required, use of a coaxial or a twisted-pair cable is recommended.

WARNING: If the load is connected to the tabs of remote sensing (+/-S) and the connection from the output to this load is missing the remote sensing function could be lost due to the acting of the internal fuse of protection.

If several converters need to be connected in parallel, do the following:

THIELE KG
CONNECTIONS

Power connections (input and output)

Input & Output: Connectors for cables up to 16mm²
 Earth M5 threaded stud

Signals connector

1	+ Inhibit
2	- Inhibit
3	- Remote sense
4	+ Remote sense
5	Alarm relay NC (closed when alarm)
6	Alarm relay Common
7	Alarm relay NO (open when alarm)

- Set the output voltage for all converters featuring a mutual difference as small as possible.
- Join the load outputs by using cables with a cross-section no greater than the one required and of equal length.
- Do not use remote sensing.

For safety reasons, the following requirements must be complied with:

- Provide the equipment with a protective enclosure that complies with the electrical safety directives in effect within the country where the equipment is installed.
- Only replace the fuse with another fuse of the same rating and type, and only after disconnecting the converter from DC power.
- In case of installing input breaker, we recommend one with a current rating higher than the maximum input current curve C. See ORDERING CODES table.
- In case of installing input fuse, we recommend one with a current rating higher than the maximum input current type T (time lag). See ORDERING CODES table.

ALARM

The alarm can be activated by the following reasons:

- When the output voltage is lower than 80...88% of Vout nom.
- When there is a defective fan. In this case the LED Vin OK blinks.
- When the internal temperature reaches about 98°C; just a few degrees below the overtemperature protection shutdown. In this case the LED Vin OK also blinks.

CE EU DECLARATION OF CONFORMITY

The undersigned, representing the following:

Manufacturer: PREMIUM, S. A.,
Address: C/ Dolors Aleu 19-21, 08908 L'Hospitalet de Llobregat, SPAIN

herewith declares that the product:

Type: DC/DC converter
Models: **CRS-1000-6475 ... 6493**

is in conformity with the provisions of the following EU directive(s):

2014/35/EU	Low voltage
2014/30/EU	Electromagnetic compatibility
2011/65/EU	Restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS)

and that standards and/or technical specifications referenced overleaf have been applied:

EN 60950-1: 2005	Safety. Information technology equipment
EN 62368-1: 2014	Safety. Audio/video, information and communication technology equipment
EN 61000-6-4: 2007	Generic emission standard
EN 61000-6-2: 2005	Generic immunity standard
EN 50155: 2017*	Railway applications. Electronic equipment used on rolling stock material
EN 50121-3-2: 2016* IEC 62236-3-2: 2018*	Railway applications. EMC Rolling stock equipment
EN 50121-4: 2016* IEC 62236-4: 2018*	Railway applications. EMC of the signalling and telecommunications apparatus

* See annexe

CE marking year: **2018**

Notes:

For the fulfillment of this declaration the product must be used only for the aim that has been conceived, considering the limitations established in the instructions manual or datasheet.

L'Hospitalet de Llobregat, 28-08-2019

Jordi Gazo
Chief Executive Officer

PREMIUM S.A. is an ISO9001 and ISO14001
certified company by **Bureau Veritas**
